MB 18-184 COMMENTS IN SUPPORT

Dear FCC Commissioners:

My name is Victor M. Vickers. I am a long-time broadcaster in Georgia, licensee or operator of stations WSIZ 102.3 FM, WTTY 97.7 FM, WGSW 106.9 FM, WVHY 97.1 FM, and FM translator station W260BU 99.9 FM. Collectively, my stations represent the “My FM” Classic Hits Radio Network, serving many rural communities in south Georgia.

The My FM stations play music that is often not heard anywhere else. We have a large following and our network is able to reach a mostly rural area of the state that other stations have mostly abandoned, as they have moved to nearby (rated) markets. The My FM network has been responsive to the small communities that numerous previous broadcasters have long left behind.

I am enthusiastically in support of the MMTC / SSR Communications proposal that would allow WTTY and WGSW to double in power to 12 kW. The C4 and 73.215 proposal outlined in MB 18-184 would be welcome news for my stations. WTTY and WGSW would be able to add approximately 63,000 new combined listeners if the FCC were to implement the full proposal.

I ask that the Commission **fully implement** the MMTC and SSR / FM Class C4 and 73.215 MB 18-184 proposal. The benefit to our listeners and ability to serve our region would be incalculable.

Sincerely,

Victor M. Vickers
